

The Construction Project As An Educational Experience Report

Boyce Middle School

September	October
Construction workers cut ring samples of several trees and various classes of students analyzed the tree rings determine the age of the tree.	Students moving to the portables will help in the move. They will carry their own chair and box of supplies to their new room under teacher supervision. This is to ensure that they are comfortable when they enter the new classroom space on Tuesday, October 13th
Throughout the month, teachers have taken time to allow students to observe aspects of the grading that has occurred at the site and then discussion was conducted back in the classrooms.	Boyce Middle School Student Council is forming a Green Team and will connect with the construction team.
	Mr. Joe Brennan and Mr. Russell DelRe will attend the October Faculty Meeting to discuss educational activities that they participated in at other school construction projects.

Fort Couch Middle School

September	October
	Mr. Joe Brennan and Mr. Russell DelRe will attend the October Faculty Meeting to discuss educational activities that they participated in at other school construction projects.
