

Streams **STRIVES**!!

What is Streams **STRIVES**?

At Streams Elementary School, **Streams STRIVES** is a daily learning opportunity designed to provide timely support in order to help boost students' mastery of daily lessons. The goal is to further customize each child's learning experience, as they **strive** to achieve their best every day. This opportunity provides children with specific grade level support to review math concepts learned within the core math program daily and opportunities for further customized reading practice within a small group setting. Participation is based on ongoing, day-to-day teacher assessments of students' progress toward district learning objectives, along with daily classroom performance.

While well designed and effectively delivered primary instruction is our main goal, we recognize that sometimes students have immediate needs for re-teaching or have the ability to master content quickly, thereby requiring additional challenge. The goal of **STRIVE** time is to address these diverse learner needs in a daily, systematic way. Each grade level team, in partnership with our resource team, will collaborate in the design and delivery of daily **STRIVE** time instruction. If you have any specific questions about this initiative, please feel free to contact any member of the Streams Elementary School Resource Team or your child's classroom teacher.

It is our goal to provide daily support to our learners, as they always **STRIVE** to reach their fullest potential. Thank you for your continued support and practice with your children at home, and we look forward to working with them during the upcoming school year!
